# You can help us to build a new bridge- from the coast to the harbour in Arnager.

The longest wooden bridge in Northern Europe exists in Arnager. Our beautiful old wooden bridge dates back to 1884 and was in rapid decay. For the past 5 years we have been raising funds to build a new bridge.

Work on the new bridge, which is a true copy of the original, commenced medio October 2018. The bridge is constructed using Azobe timber which is also called "iron wood". This type of timber is commonly used worldwide when building and constructing ports and harbours.

Stage 1 and Stage 2 of the new bridge is estimated to cost DKK 3,900,000. Arnager Boat Harbour has gratefully received donations from funds and foundations.

Private persons, societies, associations and companies have also generously made contributions. We would be grateful for your donation, large or small every little helps!

The current list of generous donations is as follows:

- DKK. 1,000,000 from Nordea fonden
- DKK. 650,000 from Bornholms Regionskommune
- DKK. 600,000 from Brødrene Larsens Legat
- DKK. 500,000 from Sparekassen Bornholms Fond
- DKK. 439,473 from LAG Bornholm
- DKK. 50,000 from Hartmann Fonden
- DKK. 50,000 from Bornholms Brand

(take a memory photo☺)
